

INTRODUCTION

Flight Dove X (FDOVEX) is a digital currency token based on Blockchain technology, a decentralized, distributed ledger that records the provenance of a digital asset.

FDOVEX is developed on Polygon Network (MRC20), allowing you to leverage the fast and secure Polygon (MATIC) blockchain and run any apps with the cheapest gas fees.

Why did we choose "DOVE" for this token? The dove symbolizes loyalty, where our business policy will always be loyal to FDOVEX holders.

• Easy Token Integration

Our FDOVEX needs cereals to be able to grow and become big. Cereals will be used for any FDOVEX ecosystem, such as a Trading bot, NFT Marketplace, etc. Just include the FDOVEX smart contract for easy token integration.

Token Contracts

Smart contracts are code that runs on a blockchain designed for specific apps or services. That allows you to leverage the fast and secure blockchain.

Decentralized

Blockchain technology is most simply defined as a decentralized, distributed ledger that records the provenance of a digital asset. And the data on a blockchain is unable to be modified.
